

nuScenes Stage 1 imagination — object-only stays bounded; decoupled+visibility drifts and saturates

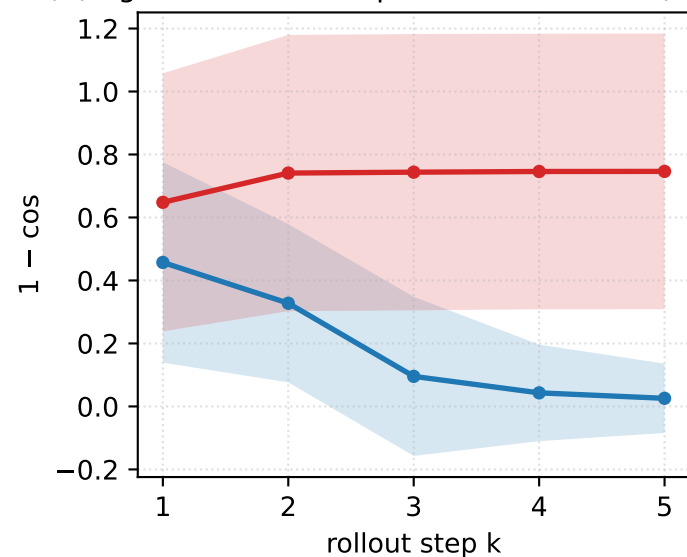

(A) Imagined collision probability

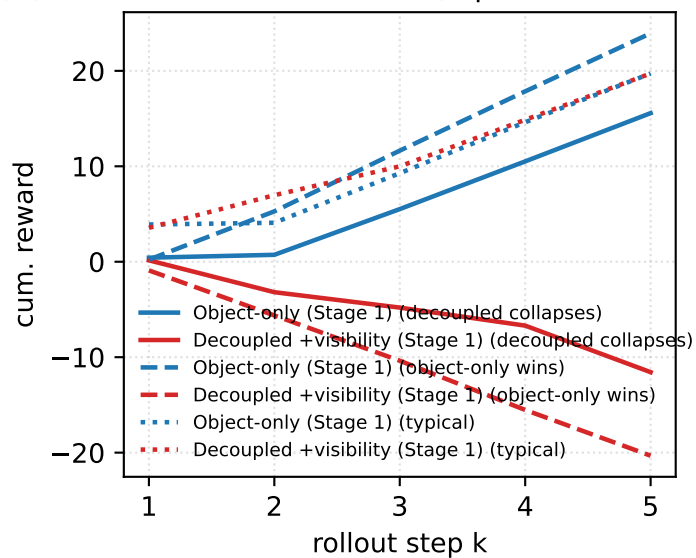

(B) Policy mean action norm $\|a_{\text{mean}}\|_2$

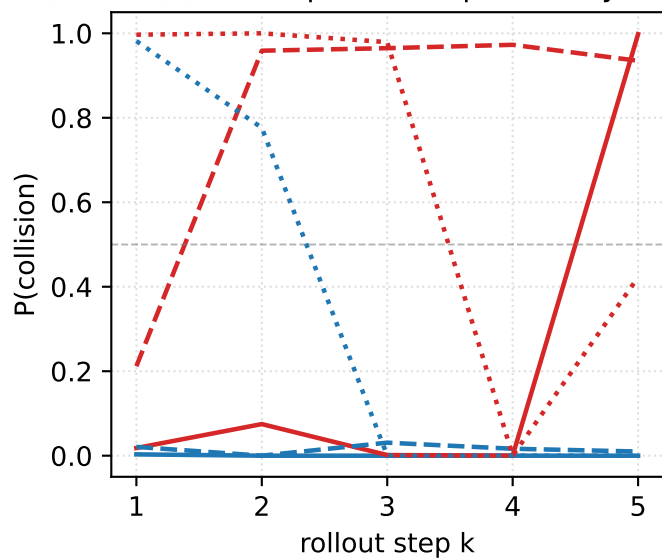

(C) Ego-slot cosine step distance $1 - \cos(e_t, e_{t+1})$

(D) Cumulative latent return (representative samples)

(E) Per-step collision probability

(F) Action norm
